Notice about Quiz 2

Quiz 2 is on 28 October 2022. See "Information about Quizzes" under Assessments.

Details about Quiz 2

Date: available from 28 October 2022 at 8am for 24 hours until 8am on 29 October (NZ time). Students in New Zealand are expected to complete the Quiz on 28 October 2022.

Where: Quiz 2 can be found under Assessments in Stream

Time: Three (3) hours. You have one attempt and you stop after 180 minutes.

Content covered: week 6 to week 11

Main focus of Quiz 2: classes, vectors, pointers, linked lists, a small amount of graphics

Marks: Quiz 2 is out of 45 but counts 25 marks towards your final result.

Preparing for Quiz 2

There are four (4) questions. Each question has sections a, b, c, ...

Question 1 (4 marks)

Study the notes and workshop for Week 6 to prepare for Question 1. Know how to use pointers and how to use call by reference.

Question 2 (11 marks)

Study notes and workshops for Weeks 8 and 9 (and Assignment 3) to prepare for Question 2.

You will ***not*** have to design a new recursive program.
You will ***not*** have to design any new images.

Question 3 (16 marks)

Study notes and workshops for Weeks 7 and 10 to prepare for Question 3. Ensure that you are familiar with designing new classes and using vectors.

Question 4 (14 marks)

Study notes and workshops for Weeks 7 and 11 to prepare for Question 4. Ensure that you are familiar with classes and with programming using linked lists. Note that you need to be able to work with your own linked lists (we will not use the list library in Quiz 2).

Do not waste time: look through the questions. Allocate your time to each question. If your allocated time runs out, move on to another question – come back if enough time at the end. No point in getting Question 1 perfect and then not doing the other questions.

If you are not available to write Quiz 2 on the correct date then a written excuse must be provided. Quiz 2 is important – please make every effort to do the quiz on the correct date.

How to calculate your final result in 159.102

Assignment 1 = 15%
Assignment 2 = 20%
Assignment 3 = 15%
Quiz 1 = 25%
Quiz 2 = 25%

Total for the course = 100%. You pass if your mark is 50% or higher.

NOTE 1: **there is no exam for 159.102** – the exam has been replaced by Quiz 2.

NOTE 2: your final result is **not** calculated on Stream. It is calculated separately.

Rules for all quizzes including Quiz 2

You are NOT allowed to:

- communicate with other students (or outside help) during the 24-hour period
- mention the test in forums or discord during the 24-hour period
- copy solutions from the internet (or from other people). We do random checks.

You are allowed to:

- use Atom (or another IDE) during the quiz
- copy your own programs from Atom into the quiz
- use any calculator or use the computer as a calculator
- read any notes of the course including programming practice, workshops, etc

If lecturers suspect that a student has not followed these rules, we will arrange a zoom session in which the student must explain their code. Please do not be offended if you are asked to attend one of these zoom sessions, it is a necessary part of quality assurance for the course.
